

Ridho Hafiz

.NET | GO - Backend Developer

Bekasi, West Java 17412 • (+62) 0812-8334-210 • [Portfolio](#)

Experienced in backend development using C# (.NET) and Go, with strong understanding of system architecture including monolith, schedulers, and microservices. Familiar with deployment via IIS and Red Hat OpenShift, RESTful APIs and gRPC for service integration, and RabbitMQ as a message broker. Worked with various databases such as SQL Server, PostgreSQL, MySQL, Oracle, and MongoDB. Comfortable using CI/CD tools like Bitbucket, Jira, and Confluence, and handling file storage through MinIO and SFTP. Monitoring and logging handled via Elasticsearch and Grafana. Applied both Agile and Waterfall development methodologies.

Experience

AUGUST 2022 – MAY 2025

Software Engineer | PT Lawencon Internasional on Client PT Bank Rakyat Indonesia | Jakarta, Indonesia

- Developed and maintained B2B applications using .NET and Golang.
- Designed microservices and integrated them with RESTful APIs and gRPC.
- Built an insurance application integrated with WSDL-based web services.
- Improved performance and reliability of various backend systems.
- Collaborated closely with cross-functional teams using Agile methodologies.

FEBRUARI 2020 – AUGUST 2022

Hardware Interface Programmer | PT Nutech Integrasi | Jakarta, Indonesia

- Maintained and enhanced a desktop ticketing system for PT ASDP Indonesia Ferry.
- Integrated real-time data using RESTful APIs and Socket.IO.
- Conducted R&D on hardware including e-KTP, e-passports, and scanning devices.
- Improved user experience by optimizing software-hardware communication.

Technical Skills

- Backend development (.NET, Golang)
- API integration (RESTful APIs, gRPC, WSDL)
- Real-time communication (Socket.IO)
- Microservices architecture & scheduler services
- Databases: SQL & NoSQL
- File systems: MinIO, FTP
- Deployment: IIS & Cloud
- Message Broker: RabbitMQ

Education

Bachelor of Computer Science | Bina Nusantara University | Indonesia

3.58 GPA • Implementing Robotics/Electronics Systems with Machine Learning

Associate degree of Electronic Engineering | State of Jakarta university | Indonesia

3.29 GPA • IoT-based Automatic Cat Feeding System
